Experience

Lead / Founding Product Designer

Jul 2021 – Dec 2025 · 4 yrs 6 mos

Select Star (acquired by Snowflake) | San Francisco, CA

Data Discovery, Governance, Metadata Management Platform

- **Led founding design across multiple platform products**—including AI, search, lineage, and governance—partnering closely with the CEO, engineering, and customer-facing teams from seed stage through Snowflake acquisition
- **AI Agents & Natural Language Search:** Designed AI-powered enterprise workflows, architecting Natural Language Search and AI agent experiences with explainability layers supporting 12K+ enterprise data assets, reducing ad-hoc data requests across enterprise data teams
- **Complex Data Visualization:** Partnered with engineering to redesign high-cardinality lineage visualization, reducing root-cause analysis time from days to hours while increasing Lineage feature adoption by 28% post-launch
- **Design System & Efficiency:** Built a scalable design system adopted across core platform experiences, reducing engineering UI implementation time by >50%

Product Designer

May 2020 – Jun 2021 · 1 yrs 2 mos

Stratifi Technologies | San Francisco, CA

FinTech Risk Management Platform (Backed by Y Combinator)

- **Risk Analytics Reporting:** Spearheaded the redesign of reporting tools to visualize complex risk data. Successfully reduced report generation time by 30%, streamlining the critical workflow for financial advisors
 - **Interactive Dashboards:** Designed and launched new portfolio risk analysis dashboards. Simplified complex financial metrics into actionable insights, which significantly improved user clarity and customer retention rates
 - **Advisor Workflow Optimization:** Conducted in-depth user research to diagnose friction points in the advisor platform. Delivered targeted UX improvements that resulted in a sustained increase in daily active usage
-
